VOLUME CONTENTS

Number 1

J. Malinowski and W. Preuss	1	Reliability of reverse-tree-structured systems with multistate components
J. Malinowski and W. Preuss	9	Reliability evaluation for tree-structured systems with multistate components
Yu-Hong Zhang	19	Reliability analysis of an (N+1)-unit standby system with 'preemptive priority' rule
S. V. Gurov and L. V. Utkin	27	Reliability of repairable systems with periodic modifications
Keh-Wei Chen and A. S. Papadoupoulos	37	Comparison of the linear least squares and nonlinear least squares spheres
H. Schäbe	47	Combining failure rate data from various sources
H. Schäbe	55	Computing instationary availability for maintained systems
I. S. Qamber and A. A. Kamal	71	A new developed transient-behaviour solution technique for reliability evaluation of electrical systems
Y. L. Mok, M. Xie and T. N. Goh	83	Planning environmental stress-screening based on DOD-HDBK-344—a case study
A. Chaturvedi	91	Sequential interval estimation procedures for the mean exponential survival time and reliability function
P. Kumar, J. L. Gaindhar and J. S. Bhatia	97	Reliability analysis of an automotive transmission system
R. M. Jacobs	101	Product recall—a vendor/vendee nightmare
		Technical Notes
H. P. Singh and H. S. Raghuvanshi	105	A new shrinkage estimator for the exponential scale parameter
A. K. Srivastava	109	Estimation of linear regression model with rank deficient observations matrix under linear restrictions
B. Chandrasekar and S. Paul Rajamanickam	111	A property of counting process in multivariate renewal theory
D. Pandey, M. Jacob and J. Yadav	115	Reliability analysis of a powerloom plant with cold standby for its strategic unit

Number 2

M. J. Patyra, Yi Sun and C. Thomborson	121	Optimized carry lookahead adders with direct feeding
W. Xie, M. Xie and T. N. Goh	133	A mixed Poisson model and its application to attribute testing data
M. N. Gopalan and P. R. Sadananda Rao	141	On the transient analysis of a maintained system subject to random stresses
H. Yamamoto	151	Reliability of a connected-(r_1, s_1)-or-(r_2, r_2)-or-. . .-or-(r_k, s_k)-out-of-$(m, n):F$ lattice system
B. S. Dhillon and N. Yang	169	Availability analysis of a robot with safety system
K. C. Madan	179	On a vacation queue with instantaneous customer loss
Zhuang Yiqi and Sun Qing	189	$1/f$ noise as a prediction of long-term instability in integrated operational amplifiers

M. S. Finkelstein	195	Succession-dependent shock models
Ying Hui Tang	199	Downtime of the service station in $M/G/1$ queueing system with repairable service station
R. O. Al-Seedy	203	Analytical solution of the state-dependent Erlangian queue: $M/E_j/1/N$ with balking
R. P. Anjard	207	Understanding and applying Deming's primary concept of profound knowledge
R. P. Anjard	213	Re-engineering basics: one of three, new, special tools for management, quality and all other professionals
R. P. Anjard	223	Process mapping: one of three, new, special quality tools for management, quality and all other professionals
B. S. Dhillon	227	Optimum life cycle and labour costs estimation of repairable equipment
Mitsuo Yamashiro and Yasunobu Yuasa	231	Repair system where the repairmen change depending on the failed machines
I. Akman	235	A statistical approach for performance evaluation of 386 and 486 microprocessors
B. Singh	241	Global reliability of three-state systems
Pour Darvish Hyderi and J. P. Singh Joorel	243	Stochastic behavior of a two-unit cold standby redundant system subject to random failure
W. J. Gutjahr, G. Ch. Pflug and A. Ruszczyński	247	Configurations of series–parallel networks with maximum reliability
S. K. Singh and S. G. Nair	255	On the characteristics of a system having master and helping unit
Zhao Cezhou, Zhang Desheng and Shi Baohua	261	The two-dimensional model for the base surface current in integrated bipolar transistors and its applications
		Technical Notes
V. Sridharan and P. R. Jayashree	265	Some characteristics on a finite queue with normal partial and total failures
H. Krishna and K. K. Sharma	269	On the uniformly minimum variance unbiased estimator of availability with type I censored data
A. Kumar, S. K. Gupta and G. Taneja	273	Probabilistic analysis of a two-unit cold standby system with instructions at need
R. K. Agnihotri and S. K. Satsangi	279	Two-non-identical-unit system with priority-based repair and inspection
	283	Publications, notices, calls for papers, etc.
	291	Calendar of international conferences, symposia, lectures and meetings of interest

Number 3

M. Gharib	293	Characterizations of the exponential distribution via mixing distributions
A. Brenner	307	Performance and dependability analysis of fault-tolerant networks
A. Srivastava, R. Nema and P. K. Bhattacharya	323	An experimental study of 1.5 keV X-ray radiation effects on CMOS devices
Li Jianping	335	A bound heuristic algorithm for solving reliability redundancy optimization
F. S. Makri and Z. M. Psillakis	341	Bounds for reliability of k-within two-dimensional consecutive-r-out-of-n failure systems

R. K. Singh, S. M. H. Zaidi and S. A. H. Rizvi	347	Some estimators of finite population variance using information on two auxiliary variables
M. A. Hariga	353	A maintenance inspection model for a single machine with general failure distribution
F. K. Wang, J. B. Keats and W. J. Zimmer	359	Maximum likelihood estimation of the Burr XII parameters with censored and uncensored data
H. Singh, S. Vaithilingam, R. K. Anne and L. Anneberg	363	Terminal reliability using binary decision diagrams
H. Singh, H. Singh Bawa and L. Anneberg	367	Boolean neural network realization of an adder–subtractor cell
N. Balakrishnan, M. P. Chandramouleeswaran and R. S. Ambagaspitiya	371	BLUEs of location and scale parameters of Laplace distribution based on Type-II censored samples and associated inference
N. Balakrishnan and M. P. Chandramouleeswaran	375	Reliability estimation and tolerance limits for Laplace distribution based on censored samples
B. N. Sur	379	Reliability evaluation of k-out-of-n redundant system with partially energized stand-by units
M. S. Moustafa	385	Availability of K-out-of-N:G systems with M failure modes
M. Yamashiro	389	A system where the number of servers changes depending on the queue length
Z. Pan, N. Eguchi and Y. Nonaka	393	Redundancy optimization in consideration of uncertainty
Kyung S. Park and Kwang T. Jung	399	Estimating human error probabilities from paired ratios
		Technical Notes
M. N. Gopalan and S. Kannan	403	Probability of first passage analysis of a two-stage transfer-line production system with storage and rework
M. N. Gopalan and U. Dinesh Kumar	409	On the transient behaviour of an r-out-of-n:G system
S. Patra and R. B. Misra	415	Evaluation of probability mass function of flow in a communication network considering a multistate model of network links
C. R. Tripathy, S. Patra, R. B. Misra and R. N. Mahapatra	423	Reliability evaluation of multistage interconnection networks with multi-state elements
A. Saini and A. Kumar	429	Benefit analysis of a two-unit standby system subject to jerks with installation time
D. C. Singh, P. Singh and P. R. Singh	435	Shrunken estimators for the scale parameter of classical Pareto distribution
	441	World abstracts on microelectronics and reliability

Number 4

A. M. Awad	457	Properties of the Akaike Information Criterion
Ying Hui Tang	465	Some new reliability problems and results for one-unit repairable system
T. Meitzler, G. Gerhart and H. Singh	469	On modification of the relative complexity metric
S. Kumar, D. Kumar and N. P. Mehta	477	Behavioural analysis of a shell gasification and carbon recovery process in a urea fertilizer plant
G. Shankar and V. Sahani	481	GERT analysis of a two-unit warm standby system with repair
FL. Popenţiu and D. N. Boroş	485	Software reliability growth supermodels
Zhao Cezhou, Zhang Desheng and Shi Baohua	493	Hot carrier effect—model, mechanism and effects on C–V and I–V characteristics in MOS structures

G. S. Mokaddis and M. L. Tawfek	497	Some characteristics of a two-dissimilar-unit cold standby redundant system with three modes
		Technical Notes
M. N. Gopalan and U. Dinesh Kumar	505	Approximate analysis of n-unit cold-standby systems
S. Bansal and R. K. Bansal	511	Reliability and performance evaluation of four tree multistage interconnection network
L. R. Goel, S. Z. Mumtaz and R. Gupta	517	A two-unit duplicating standby system with correlated failure-repair/replacement times
M. N. Gopalan and U. Dinesh Kumar	525	On the transient behaviour of a repairable system with a warm standby
	533	World abstracts on microelectronics and reliability
	561	Letter to the editor
	563	Book reviews
	567	Publications, notices, calls for papers, etc
	577	Calendar

Number 5

N. Singh and V. S. S. Yadavalli	581	Distribution of order statistics with varying number of components in reliability systems
Z. Khalil and M. E. Ghitany	589	On some performance characteristics for a TASI system
A. J. Watkins	595	On maximum likelihood estimation for the two parameter Weibull distribution
Yuan Lin Zhang and Tai Peng Wang	605	Repairable consecutive-2-out-of-n:F system
J. L. Roca	609	An entropy-based method for computing software structural complexity
Yisong Dai	621	An improvement on noise criterion used as a reliability screening parameter for BJTs and experimental results
Cheng Kan and Wang Wenyi	627	Approximations of a two-unit cold standby system's reliability behaviour
Yuanlong Shen	631	An improved method for symbolic reliability analysis
A. Chaturvedi, N. Tiwari and S. K. Pandey	637	Multi-stage point estimation of the common location parameter of several exponential distributions
P. K. Kapur and S. Younes	645	Modelling an imperfect debugging phenomenon in software reliability
D. S. Tracy, H. P. Singh and H. S. Raghuvanshi	651	Some shrinkage estimators for the variance of exponential density
F. S. Makri and A. N. Philippou	657	Exact reliability formulas for linear and circular m-consecutive-k-out-n:F systems
A. Touhami and A. Bouhdada	661	Interface states effect and influence of the topological and technological parameters on the transfer inefficiency in the surface charge-coupled device (SCCD)
R. Karan Singh, S. M. H. Zaidi and S. A. H. Rizvi	667	Some estimators of finite population variance using information on two auxiliary variables
S. Kumar, D. Kumar and N. P. Mehta	671	Behavioural analysis of shell gasification and carbon recovery process in a urea fertilizer plant

Zhiyu Tian, P. C. K. Liu, Ting-Ting Y. Lin and Shiyuan Yang	675	Analyzing the error of an approximate method for computing performance-related reliability
M. Mitra and S. K. Basu	679	On some properties of the bathtub failure rate family of life distributions
A. A. Ismaeel and R. Bhatnagar	685	Modeling and testing for stuck faults in pseudo nMOS combinational circuits
B. N. Sur and T. Sarkar	693	Numerical method of reliability evaluation of a stand-by redundant system
		Technical Notes
K. P. Sapna	697	An M/G/1-type queueing system with non-perfect servers and no waiting capacity
R. Gupta and A. Chaudhary	701	Cost–benefit analysis of a multi-unit parallel trichotomous system with random shocks
T. V. Gopal, G. Karthikeya Raja, D. K. Vijaykumar and V. Sankaranarayanan	707	A novel fault tolerant Token Ring Network
	711	Book reviews
	715	Publications, notices, calls for papers, etc
	725	Calendar

Number 6

SPECIAL ISSUE
PERFORMANCE MODELING AND RELIABILITY ANALYSIS

R. S. Sharma and G. S. Hura	729	Guest editorial: the practice of performance modeling and reliability analysis
A. P. A. Van Moorsel and B. R. Haverkort	733	Probabilistic evaluation for the analytical solution of large Markov models: algorithms and tool support
M. A. Qureshi and W. H. Sanders	757	The effect of workload on the performance and availability of voting algorithms
R. S. Sharma and D. W. Conrath	775	Some soft measures for performance analysis: the "core" dimensions of expert system quality
M. Xie and M. Zhao	797	Reliability growth plot—an underutilized tool in reliability analysis
Chim-Fu Yeung and Sheung-Lun Hung	807	Deadlock resolution for distributed real-time database systems
Guat Yew Tan and G. S. Hura	821	MASE: a user-friendly performance tool

Number 7/8

SPECIAL ISSUE
RELIABILITY PHYSICS OF ADVANCED ELECTRON DEVICES

N. Stojadinović	843	Guest editorial
REVIEW PAPERS		
A. Acovic, G. La Rosa and Yuan-Chen Sun	845	A review of hot-carrier degradation mechanisms in MOSFETs
M. Nafría, J. Suñé and X. Aymerich	871	Breakdown of thin gate silicon dioxide films—a review
C. Duvvury and A. Amerasekera	907	ESD issues for advanced CMOS technologies

A. S. Oates	925	Electromigration failure of contacts and vias in sub-micron integrated circuit metallizations
G. Masetti, S. Graffi, D. Golzio and ZS. M. Kovács-V.	955	Failures induced on analog integrated circuits by conveyed electromagnetic interferences: a review
P. Montangero, G. A. Azzini, H. C. Neitzert, G. Ricci and L. Serra	973	Reliability of InGaAs/InP based separate absorption grading multiplication avalanche photodiodes
N. Sinnadurai	1001	Plastic packages survive where hermetic packages fail
RESEARCH PAPERS		
R.-P. Vollertsen and W. W. Abadeer	1019	Modelling considerations and development of upper limits of stress conditions for dielectric breakdown projections
A. Paccagnella, A. Rizzato, A. Scarpa, E. Zanoni, G. Crisenza and G. Ghidini	1033	Electrical and radiation tests of thin tunnel oxides
P. E. Bagnoli, C. Ciofi, B. Neri and G. Pennelli	1045	Electromigration in Al based stripes: low frequency noise measurements and MTF tests
B. K. Jones, Y. Z. Xu and P. Zobbi	1051	The evolution of the microscopic damage in electromigration studied by multiple electrical measurements
C. Hashimoto and S. Nakajima	1063	Failure-analysis-based test chip design for quick yield improvement
G. Busatto, L. Fratelli and A. Patti	1077	Advanced RBSOA analysis for advanced power BJTs
L. Serra, G. A. Azzini and P. Montangero	1095	Blue shift and mirror degradation in InGaAs/GaAs strained quantum well lasers
E. P. Vandamme and L. K. J. Vandamme	1107	Diagnostics of the quality of MOSFETs
C. Böhm, J. Sprengepiel and E. Kubalek	1113	Diagnosis in submicron integrated circuits by electric force microscopy
TECHNICAL NOTES		
P. Conti and P. Audagnotto	1119	Pseudomorphic HEMTs reliability with scattering and noise parameters
T. Olbrich, A. M. D. Richardson and D. A. Bradley	1125	Built-in self-test and diagnostic support for safety critical microsystems
	1137	List of reviewers
	1139	Call for papers

Number 9

Kuey Chung Choi, Kyung Hyun Nam and Dong Ho Park	1141	Estimation of capability index based on bootstrap method
L. V. Utkin, S. V. Gurov and M. I. Shubinsky	1155	Reliability growth in the probability and possibility contexts
Huiyang Zhou, Liangsheng Qu and Aihua Li	1167	Test sequencing and diagnosis in electronic system with decision table
L. H. Shu, A. Christou and D. F. Barbe	1177	High temperature device simulation and thermal characteristics of GaAs MESFETs on CVD diamond substrates
T. J. Sanders, K. Rekab and S. H. Chung	1191	Statistical simulation of IC technology: a bipolar process example
M. Meniconi and D. M. Barry	1207	The power function distribution: a useful and simple distribution to assess electrical component reliability

I. J. Jóźwiak	1213	Procedure of creating a reliability-functional model for a chosen computer system
Yuanlong Shen	1219	Computerization of the *R-ABC* algorithm
B. C. Soh and T. S. Dillon	1223	Hardware fault latency: problem formulation and solution
B. C. Soh and T. S. Dillon	1231	Hardware fault latency: model validation
Kapsu Kim and Chisu Wu	1237	A reliability analysis technique for object-oriented model using a reliability Petri net
A. K. Srivastava and Shalabh	1249	Properties of a consistent estimation procedure in ultrastructural model when reliability ratio is known
R. Billinton, Hua Chen and R. Ghajar	1253	Time-series models for reliability evaluation of power systems including wind energy
Jae-Joon Suh, Chi-Moon Hau and Chi-Hyuck Jun	1263	System reliability estimation using simulation combined with network reductions
C. R. Vallarino and K. J. Elsey	1269	Choosing from redundant designs of power systems using system outage rate and cost
G. Shankar and V. Sahani	1275	GERT analysis of a two-unit warm standby system with repair
T. V. Gopal, N. S. Karthic Nataraj, C. Ramamurthy and V. Sankaranarayanan	1279	Load balancing in heterogenous distributed systems
S. Narmada and M. Jacob	1287	Reliability analysis of a complex system with a deteriorating standby unit under common-cause failure and critical human error
J. C. Yang	1291	Non-destructive identification of defects in integrated circuit packages by scanning acoustic microscopy
		Technical Notes
G. C. Sharma and M. Agrawal	1297	Some reliability measures of a system of components sharing a common environment
P. Chandrasekhar and R. Natarajan	1303	Confidence limits for steady-state availability of systems with a mixture of exponential and gamma operating time and lognormal repair time
A. Chaturvedi and U. Rani	1305	Fixed-width confidence interval estimation of the inverse coefficient of variation in a normal population
G. Shankar and S. Joseph	1309	CSCC for mean of an inverse Gaussian distribution under type I censoring
A. J. Watkins	1313	Letter to the Editor
	1315	Book reviews
	1319	Call for papers

Number 10

R. K. Jain and S. Jain	1323	Inverse Gaussian distribution and its application to reliability
A. N. Ahmed, A. A. Soliman and S. E. Khider	1337	On some partial ordering of interest in reliability
Min-Tsai Lai and Bor-Yuh Leu	1347	An economic discrete replacement policy for a shock damage model with minimal repairs
H. Arsham	1357	Stochastic optimization of discrete event systems simulation
A. Rawicz, M. Parameswaran and J. M. Chen	1369	Reliability and yield in fabrication of microcantilever structures using bulk silicon micromachining

M. Shelton Peiris	1375	Improving the precision on forecasting
J. Blanchart	1379	A physical strength–stress interference model explaining infant and random mortality
J. Malinowski and W. Preuss	1389	A recursive algorithm evaluating the exact reliability of a circular consecutive k-within-m-out-of-n:F system
H. Schäbe	1395	Optimum stochastic inspection policies for a system with safety device
H. Pham, A. Suprasad and R. B. Misra	1407	Reliability analysis of K-out-of-N systems with partially repairable multi-state components
J. Malinowski and W. Preuss	1417	Reliability increase of consecutive k-out-of-n:F and related systems through components' rearrangement
S. V. Gurov and L. V. Utkin	1425	Cold standby systems with imperfect and noninstantaneous switch-over mechanism
H. Arsham	1439	Confidence regions having different shapes for the failure distribution function
L. V. Utkin and S. V. Gurov	1459	Reliability of composite software by different forms of uncertainty
P. Zeephongsekul	1475	Reliability growth of a software model under imperfect debugging and generation of errors
J. Malinowski and W. Preuss	1483	Reliability of a 2-way linear consecutively connected system with multistate components
Z. H. Tong, S. S. Ang and W. D. Brown	1489	Effects of gamma irradiation on the insulated-gate bipolar transistor
H. H. S. Javadi	1499	Composite material behavior under applied electric field: material switches to a high-resistive state
Li Jianping	1515	A bound dynamic programming for solving reliability redundancy optimization
B. S. Dhillon	1521	Mean time to failure formulas for standard reliability networks with Erlangian distributed component failure times
I. J. Jóźwiak	1525	The failure time random variable modelling
H.-Z. Huang	1531	Reliability evaluation of a hydraulic truck crane using field data with fuzziness
C. Galikowsky, B. D. Sivazlian and P. Chaovalitwongse	1537	Optimal redundancies for reliability and availability of series systems
K. A. Mehdi and J. M. Kontoleon	1547	A rapid SMART approach for reliability and failure mode analysis of memories and large systems
Ching-Hsue Cheng	1557	Fuzzy repairable reliability based on fuzzy GERT
M. A. W. Mahmoud and M. A. Esmail	1565	Probabilistic analysis of a two-unit warm standby system subject to hardware and human error failures
M. M. Azzam and A. M. Awad	1569	Entropy measures and some distribution approximations
T. Dohi, S. Osaki and N. Kaio	1581	Optimal planned maintenance with salvage cost for a two-unit standby redundant system
		Technical Notes
A. K. Azad and R. B. Misra	1589	A new approach to evaluate two area interconnected power generating systems reliability
A. Kumar, S. K. Gupta and G. Taneja	1595	Comparative study of the profit of a two server system including patience time and instruction time

Number 11/12

SPECIAL ISSUE

7th European Symposium on RELIABILITY OF ELECTRON DEVICES, FAILURE PHYSICS AND ANALYSIS (ESREF 96)

Preface vii
G. Groeseneken, H. E. Maes, A. J. Mouthaan and J. F. Verweij

KEYNOTE INVITED PAPERS

Relation between yield and reliability of integrated circuits and application to failure rate assessment and reduction in the one digit FIT and PPM reliability era 1603
J. A. van der Pol, F. G. Kuper and E. R. Ooms

AC effects in IC reliability 1611
Chenming Hu

THEME 1—FAILURE MECHANISMS AND MODELING

Oxide Degradation

Assessment of oxide charge density and centroid from Fowler-Nordheim derivative characteristics in MOS structures after uniform gate stress 1619
R. Kies, T. Egilsson, G. Ghibaudo and G. Pananakakis

Investigation of trapped charge in oxides under Fowler-Nordheim stress using low bias conditions 1623
R. Duane, A. Martin, P. O'Donovan, P. Hurley, P. O'Sullivan and A. Mathewson

Threshold voltage degradation in plasma-damaged CMOS transistors—role of electron and hole traps related to charging damage 1627
T. Brożek, Y. D. Chan and C. R. Viswanathan

Dielectric Breakdown

Comprehensive gate-oxide reliability evaluation for DRAM processes (Invited Paper) 1631
R.-P. Vollertsen and W. W. Abadeer

A new analytic model for the description of the intrinsic oxide breakdown statistics of ultra-thin oxides 1639
R. Degraeve, Ph. Roussel, G. Groeseneken and H. E. Maes

Electric field dependence of TDDB activation energy in ultrathin oxides 1643
E. Vincent, N. Revil, C. Papadas and G. Ghibaudo

Enhancement of t_{bd} of MOS gate oxides with a single-step pre-stress prior to a CVS in the Fowler-Nordheim regime 1647
A. Martin, T. Ribbrock, P. O'Sullivan and A. Mathewson

A new statistical model for fitting bimodal oxide breakdown distributions at different field conditions 1651
R. Degraeve, Ph. Roussel, J. L. Ogier, G. Groeseneken and H. E. Maes

A new physics-based model for time-dependent dielectric breakdown (Invited Paper) 1655
B. J. Schlund, J. Suehle, C. Messick and P. Chaparala

Hot Carrier Degradation

New experimental findings on hot carrier effects in deep submicrometer surface channel PMOS 1659
Jong Tae Park, Sung Jun Jang, Chong Gun Yu, Byung Gook Park and Jong Duk Lee

Hot-carrier reliability of n- and p-channel MOSFETs with polysilicon and CVD tungsten-polycide gate 1663
C. L. Lou, W. K. Chim, D. S. H. Chan and Y. Pan

Comprehensive physical modeling of NMOSFET hot-carrier-induced degradation 1667
M. M. Lunenborg, H. C. de Graaff, A. J. Mouthaan and J. F. Verweij

Relationship between profile of stress-generated interface traps and degradation of submicron LDD MOSFETs 1671
S. Okhonin, T. Hessler and M. Dutoit

Measurement and modeling of a new width dependence of NMOSFET degradation 1675
F. Schuler, O. Kowarik and D. Keitel-Schulz

The impact of oxide degradation on the low frequency (I/f) noise behaviour of p channel MOSFETs 1679
P. K. Hurley, E. Sheehan, S. Moran and A. Mathewson

Metal Migration

Designing circuits and processes to optimize performance and reliability: metallurgy meets TCAD (Invited Paper) 1683
C. V. Thompson and B. D. Knowlton

Resistance changes due to Cu transport and precipitation during electromigration in submicrometric Al-0.5%Cu lines 1691
A. Scorzoni, I. de Munari, R. Balboni, F. Tamarri, A. Garulli and F. Fantini

A new technique to characterize the early stages of electro-migration-induced resistance changes at low current densities 1695
V. d'Haeger, W. de Ceuninck, G. Knuyt, L. de Schepper and L. M. Stals

Study of the microstructure of IC interconnect metallisations using analytical transmission electron microscopy and secondary ion mass spectrometry 1699
P. Cosemans, M. d'Olieslaeger, W. de Ceuninck, L. de Schepper and L. Stals

Finite element investigations of mechanical stress in metallization structures 1703
K. Weide, X. Yu and F. Menhorn

ESD Testing and Characterization

Study of the soft leakage current induced ESD on LDD transistor (Invited Paper) 1707
T. Wada

Pulsed thermal characterization of a reverse biased pn-junction for ESD HBM simulation 1711
H. Wolf, H. Gieser and W. Wilkening

Justifications for reducing HBM and MM ESD qualification test time 1715
K. Verhaege, D. Robinson-Hahn, C. Russ, M. Farris, J. Scanlon, D. Lin, J. Veltri and G. Groeseneken

Reproducibility of field failures by ESD models—comparison of HBM, socketed CDM and non-socketed CDM 1719
T. Brodbeck, H. Bauch, X. Guggenmos and R. Wagner

Influence of parasitic structures on the ESD performance of a pure bipolar process 1723
T. Nikolaïdis, C. Richier, M. Reffay, P. Mortini and G. Pananakakis

ESD Protection and Modeling

ESD protection to overcome internal gate-oxide damage on digital-analog interface of mixed-mode CMOS IC's 1727
Ming-Dou Ker and Ta-Lee Yu

Efficient output ESD protection for 0.5-μm high-speed CMOS SRAM IC with well-coupled technique 1731
Ming-Dou Ker and Chau-Neng Wu

Turn-on speed of grounded gate nMOS ESD protection transistors 1735
G. Meneghesso, J. R. M. Luchies, F. G. Kuper and A. J. Mouthaan

Simulation study for the CDM ESD behaviour of the grounded-gate nMOS 1739
C. Russ, K. Verhaege, K. Bock, G. Groeseneken and H. E. Maes

Risetime effects of HBM and square pulses on the failure thresholds of GGNMOS-transistors 1743
C. Musshoff, H. Wolf, H. Gieser, P. Egger and X. Guggenmos

THEME 2—FAILURE ANALYSIS AND CHARACTERIZATION

Characterization Techniques

Copper interconnection lines: SARF characterization and lifetime test 1747
C. Ciofi, V. Dattilo and B. Neri

Experimental validation of mechanical stress models by micro-Raman spectroscopy 1751
I. de Wolf, G. Pozzat, K. Pinardi, D. J. Howard, M. Ignat, S. C. Jain and H. E. Maes

A new method to determine the influence of thermomechanical stress on the reliability of metal lines in integrated circuits 1755
A. v. Glasow, H. Kammer and A. Kohlhase

A current self-limited protective device studied by LF-noise measurements 1759
A. Modjtahedi, L. Lamaignere, F. Verdier, A. Touboul and F. Carmona

Influence of the ferroelectric domain structure and switching properties on the endurance of PZT ferroelectric capacitors 1763
D. J. Wouters and H. E. Maes

Scanning Probe and Ion Beam Techniques

Nanoscopic evaluation of semiconductor properties by scanning probe microsopies (Invited Paper) 1767
L. J. Balk, R. Heiderhoff, P. Koschinski and M. Maywald

The application of advanced techniques for complex focused-ion-beam device modification 1775
M. T. Abramo and L. L. Hahn

A comparison of focused ion beam and electron beam induced deposition processes 1779
S. Lipp, L. Frey, C. Lehrer, E. Demm, S. Pauthner and H. Ryssel

Oxide breakdown decrease by oxide growth projection of implantation-caused stacking faults—a characterization case study using atomic force microscopy 1783
P. Jacob and K. Hoeppner

Reliability of a focused ion beam repair on digital CMOS circuits 1787
R. van Camp, K. van Doorselaer and I. Clemminck

Packaging Related and Thermal Characterization Techniques

Soldered joints on leaded components: development of a design tool to predict failure during temperature cycle tests (Invited Paper) 1791
P. M. M. Wolbert and A. C. Brombacher

Examination of reflow resistance for copper frame SMD products (Invited Paper) 1799
T. Setoya, T. Matsuura, K. Furuta, Y. Terui, Y. Soekawa, S. Koike and Y. Kishimura

Characterisation of Chip-on-Board and Flip Chip packaging technologies by acoustic microscopy 1803
W. Lawton and J. Barrett

Evaluation of structural degradation in packaged semiconductor components using a transient thermal characterisation technique 1807
F. Christiaens, B. Vandevelde, E. Beyne and J. Roggen

A practical system for hot spot detection using fluorescent microthermal imaging 1811
J.-Y. Glacet and S. Berne

THEME 3—RELIABILITY EVALUATION, PREDICTION AND METHODOLOGY

Built-in Reliability and Yield

Improved critical area prediction by application of pattern recognition techniques 1815
J. H. N. Mattick, R. W. Kelsall and R. E. Miles

The influence of process variations on the robustness of an audio power IC 1819
B. Krabbenborg and J. van der Pol

Method for precise determination of the statistical distribution of the input offset voltage of differential stages 1823
R. Thewes, T. Schindhelm, M. Tiebout, E. Wohlrab, U. Kollmer, S. Kessel, D. Schmitt-Landsiedel and W. Weber

Reliability improvement of single-poly quasi self-aligned BiCMOS BJTs using base surface arsenic compensation 1827
L. Vendrame, T. Gravier, J. Kirtsch, A. Monroy and A. Chantre

Validation of yield models with CMOS/SOS test structures 1831
V. Riviere, A. Touboul, S. Ben Amor and G. Gregoris

Quality and reliability improvement through defect oriented failure analysis 1835
P. de Pauw and S. van Haeverbeke

Wafer Level Reliability

Wafer level reliability: process control for reliability (Invited Paper) 1839
T. E. Turner

The isocurrent test: a promising tool for wafer-level evaluation of the interconnect reliability 1847
A. Witvrouw, S. van Dooren, D. Wouters, M. van Dievel and K. Maex

Wafer level measurement system for SARF characterization of metal lines 1851
C. Ciofi, M. de Marinis and B. Neri

A new wafer level reliability method for evaluation of ionic induced pMOSFET drift effects 1855
A. Dreizner, J. Nagel and R. Scharfe

A wafer level reliability method for short-loop processing 1859
J. B. Duluc, T. Zimmer, N. Milet and J. P. Dom

Reliability of Power Devices

Reliability indicators for lift-off of bond wires in IGBT power-modules 1863
B. Farokhzad, P. Türkes, E. Wolfgang and K. Goser

Effects of metallization lay-out on turn-off failure of modern power bipolar transistors 1867
G. Busatto, A. Conte and A. Patti

SEGR: a unique failure mode for power MOSFETs in spacecraft 1871
M. Allenspach, J. R. Brews, K. F. Galloway, G. H. Johnson, R. D. Schrimpf, R. L. Pease, J. L. Titus and C. F. Wheatley

Design of a test structure to evaluate electro-thermomigration in power ICs 1875
I. de Munari, F. Speroni, M. Reverberi, C. Neva, L. Lonzi and F. Fantini

THEME 4—COMPOUND SEMICONDUCTOR RELIABILITY

Compound Semiconductor Reliability: Methods and Effects

The GaAs heterojunction bipolar transistor: an electron device with optical device reliability (Invited Paper) 1879
T. S. Henderson

Simulation of the gate burnout of GaAs MESFET 1887
V. A. Vashchenko, J. B. Martynov, V. F. Sinkevitch and A. S. Tager

Characterisation of reliability of compound semiconductor devices using electrical pulses 1891
M. Brandt, V. Krozer, M. Schüßler, K.-H. Bock and H.-L. Hartnagel

Drain current DLTS analysis of recoverable and permanent degradation effects in AlGaAs/GaAs and AlGaAs/InGaAs HEMT's 1895
G. Meneghesso, Y. Haddab, N. Perrino, C. Canali and E. Zanoni

The effect of hot electron stress on the DC and microwave characteristics of AlGaAs/InGaAs/GaAs PHEMTs 1899
R. Menozzi, M. Borgarino, P. Cova, Y. Baeyens and F. Fantini

Compound Semiconductor Reliability: Devices

Analysis of the surface base current drift in GaAs HTB's 1903
C. Maneux, N. Labat, N. Saysset, A. Touboul, Y. Danto, J. Dangla, P. Launay and J.-M. Dumas

Pulsed stress reliability investigations of Schottky diodes and HBTs 1907
M. Schüßler, V. Krozer, K. H. Bock, M. Brandt, L. Vecci, R. Losi and H. L. Hartnagel

DC, LF and HF characterisation of short-time stressed InP based LM-HEMTs 1911
D. Schreurs, A. Spiers, W. de Raedt, K. van der Zanden, Y. Baeyens, M. van Hove, B. Nauwelaers and M. van Rossum

Reliability and degradation behaviors of semi-insulating Fe-doped InP buried heterostructure lasers fabricated by MOVPE and dry etching technique 1915
H. Mawatari, M. Fukuda, S.-I. Matsumoto, K. Kishi and Y. Itaya

Study on the reliability of an InP/InGaAsP integrated laser modulator 1919
V. Hornung, F. Le Du, C. Starck, G. Gelly, C. Crusson, D. Laffitte, J. F. Vinchant and D. Lesterlin

THEME 5—SYSTEM RELIABILITY AND PACKAGING

System Reliability and Packaging

Automotive and aerospace electronic systems. Dependability requirements (Invited Paper) 1923
P. D. Rose

In-situ monitoring of dry corrosion degradation of Au ball bonds to Al bond pads in plastic packages during HTSL 1931
F. W. Ragay, J. A. van der Pol and J. Naderman

Question marks to the extrapolation to lower temperatures in high temperature storage life (HTSL) testing in plastic encapsulated IC's 1935
W. Schuddeboom and M. Wübbenhorst

MicroDAC—a novel approach to measure in situ deformation fields of microscopic scale 1939
D. Vogel, A. Schubert, W. Faust, R. Dudek and B. Michel

Introduction of plastic encapsulated devices in systems operating under severe temperature conditions 1943
R. Hernandez, O. Le Peuch, B. Parmentier and R. Vial

ELECTRICAL TECHNOLOGY

Selected papers from *Elektrichestvo*

Editor-in-Chief:
V.A. Labuntsov, *Moscow Power Institute*

Translation Editor:
F.B. Hinderwell, *244 Stansted Road, Bishops Stortford, Herts CM23 2DA, UK*

AIMS AND SCOPE
Elektrichestvo, founded in 1880, is a well established major research journal covering heavy and light current engineering and energetics. Papers from this journal, selected for their contribution to the work of electrical engineers in English-speaking countries, are translated and published in *Electrical Technology*. The journal brings together papers reporting on theoretical, experimental and applied works in the following areas: theory of electrical networks and electromagnetical fields, electrophysics, power electronics, electrical machines, electrical drives, electric power plants and sytems, automation of electric power sytems, HV technology, electrical apparatus and electrical materials.

Audience: Engineers concerned with heavy and light current engineering and energetics.

ABSTRACTED/INDEXED IN:
Current Contents SCISEARCH Data, Current Contents/Engineering, Computing and Technology, INSPEC Data, Research Alert.

1996: 1996 (4 issues)

COMPUTERS & ELECTRICAL ENGINEERING

An International Journal

Editor: **M. Jamshidi**, *Department of Electrical and Computer Engineering, The University of New Mexico, Albuquerque, NM 87131, USA*
Founding Editor: **J. B. Slaughter**, *Occidental College, Los Angeles, CA 90041, USA*

AIMS AND SCOPE
Computers Electrical Engineering is a forum for addressing the relationships which exist between computer technology and electrical engineering. It provides a means of disseminating the applications of digital computers within the electrical engineering community. Considerable emphasis will be placed on the technological issues associated with the design and development of new generation computers, and the recognition of the primary role of the electrical engineer in the synthesis and production of these machines. Application papers of computers to a broad spectrum of problems encountered by practicing electrical engineers are now numerous and clearly indicate the extent to which these machines have become essential elements of the design process.Application papers of computers in such areas as signal processing, image processing, vision, robotics, manufacturing, optical systems, artificial intelligence including neural networks and fuzzy logic, and control systems among others are sought.*Computers Electrical Engineering* publishes authoritative research and application papers related to the objectives of the journal. In addition to being responsive to the professional community, the requirements of students will be met through tutorial papers on new and emerging aspects of computer technology. The journal publishes original papers, technical correspondence and summaries of emerging new computer software.

Audience: Electrical Engineers and Students involved in areas such as signal processing, vision, robotics, manufacture, optical systems and artificial intelligence.

MECHATRONICS

Mechanics - Electronics - Control
An International Journal

Editors-in-Chief: **R.W. Daniel**, *Department of Engineering Science, University of Oxford, Parks Road, Oxford OX1 3PJ, UK* and **J.R. Hewit**, *Department of Applied Physics, Electronics and Manufacturing Engineering, University of Dundee, Dundee DD1 4HN, UK*

AIMS AND SCOPE

Mechatronics is the synergistic combination of precision mechanical engineering, electronic control and systems thinking in the design of products and manufacturing processes. It is a relatively new concept relating to the design of systems, devices and products aimed at achieving an optimal balance between basic mechanical structure and its overall control.The purpose of this journal is to provide rapid publication of topical papers featuring practical developments in mechatronics. It will cover a wide range of application areas including consumer product design, instrumentation, manufacturing methods, computer integration and process and device control, and will attract a readership from across the industrial and academic research spectrum. Particular importance will be attached to aspects of innovation in mechatronics design philosophy which illustrate the benefits obtainable by an *a priori* integration of functionality with embedded microprocessor control. A major item will be the design of machines, devices and systems possessing a degree of computer based intelligence. The journal seeks to publish research progress in this field with an emphasis on the applied rather than the theoretical. It will also serve the dual role of bringing greater recognition to this important area of engineering.

Audience: Practising engineers both in industry and academia who are involved in the design and/or manufacture of products using computer controlled mechanisms or electromechanical systems.
